

A B S T R A C T

A METHOD OF DETECTING AND PREVENTING ILLICIT USE OF
CERTAIN NETWORK PROTOCOLS WITHOUT DEGRADING LEGITIMATE
5 USE THEREOF

The invention relates to a method of detecting and
preventing illegitimate use of certain network protocols
without hindering legitimate use thereof. In the
10 invention, each new stream has a count CPT (27) allocated
thereto. A delay function (25) for reducing the
illegitimate use stream without hindering the legitimate
use stream is applied to each received data packet. The
delay function increases in particular as a function of
15 the bit rate of the stream to be monitored by means of
the count CPT.
